

TECHNOLOGY RUNWAY

MODDO

Diego De Vicente
Founder
MODDO
Spain

Diego de Vicente, Honoric Professor & PhD in Technology and Retail by the University Complutense of Madrid.

My teaching career has been oriented and focused on Management of Technology, Information Technology Systems and Strategic Management, at several Spanish Universities and Masters, such as University Complutense de Madrid, University Carlos III and University San Pablo CEU. Nowadays I am Honoric Professor at the UCM.

Regarding my professional career, I have founded several companies in Real Estate, Retail & Technology Business (all of them sold to Venture Funds or active). At present, I am Founder and CEO of MODDO, the first Omnichannel Platform for Shopping Centres, and Retail with running Operations in Europe & Latinamerica.

I am also member of the Board of several companies in Real Estate, Hospitality, Retail & IT Companies.

askporter

Mavatar Technologies

Susan Akbarpour
Co-Founder & CEO
Mavatar technologies
USA

Susan Akbarpour has over 30 years of experience building innovative products and businesses in technology and media as an entrepreneur and investor. She is the CEO of Mavatar, the company she cofounded in 2011 based on her research at the Stanford Graduate School of Business, where she received an MS in Management in 2010.

mCart is a blockchain-based omnichannel marketplace and affiliate sales platform-as-a service. mCart lets any asset-holding organization monetize all their assets in one place, compensating all involved parties fairly and transparently.

Susan regularly speaks at conferences, has received multiple awards, is frequently featured in the media, and serves as a contributing writer to Forbes. Susan is a partner at Candou Ventures, board member at IMA International Executive Council and VOMax Corporation, advisory board member to Trustroot, member of Stanford Business School Alumni Association and Stanford Women On Boards, and prestige member of Watermark.

Accel Robotics

Martin Cseh
Co-Founder and Business Development Lead
Accel Robotics
USA

Martin Cseh is the co-founder of Accel Robotics, a venture-backed startup developing breakthrough AI and computer vision technology to enable fully automated “grab and go” shopping experiences.

Martin leads business development and partnerships at Accel Robotics, and his skills include building customer relationships, identifying strategic alliances, and uncovering new business opportunities.

Prior to cofounding Accel Robotics, Martin worked in digital marketing, advertising, and financial services. Martin holds a bachelor's degree from Harvard University.
