The shopping center industry is one of the most distressed industry sectors impacted by COVID-19. As our members work with state and local governments on responsible re-opening measures, it will take time for “normal” consumer activity to return. Without meaningful assistance and urgent relief the communities we serve will suffer as property and sales taxes disappear, property values plummet and vacant shopping centers and shuttered store fronts become the norm across our country. Congress and state legislatures must act now to bring life back to our communities and our communities back to life.
